

Timnath, Colorado

Timnath residents expressed concerns about odors and potential health impacts of air emissions from the Alpine Cabinet Company.

Old Town Timnath in 2005

What you can do

It's important to monitor any health effects you may be experiencing from odors in the air.

- You can use the odor complaint form to report them to Timnath.

• If you are experiencing serious health effects, please contact your health care provider.

What we did

- We reviewed all of the data collected by the Town of Timnath and Colorado State University.
- Our program evaluated the air data and considered the potential acute and chronic health risks to nearby residents and schoolchildren.
- We also compared odor thresholds to levels of contaminants found in the air to help answer questions from community members about the relationship between odors and health impacts.

What we found

- Contaminants in the air at Timnath are not expected to harm the health of residents or children attending school at Timnath Elementary School.
- Odors in the air in Timnath are not expected to harm the health of residents or schoolchildren.
- No further air monitoring is necessary at this time.
